

APPLE SEEDS:

Thoughts on Human Potential

From a single seed
how many apples trees
might someday turn green?

Our small minds fail to digest
the pith of such questions:

Perhaps we must dream deeply
to begin get answers.

Within the flesh of each moment
so many orchards of possibilities exist!

When the soil is right
& sun is not too bright
some dreams take root.

Yet others might become
morsels for hungry worms
and voracious molds
mutating in the night.

Of seeds,
what certainty exists?
