

# WREATH:

A conversion about world peace

TN

- Rea :** Unless we learn how to deal with conflict in non-violent ways, I fear humans will become extinct.
- Min :** (nodding) That scenario seem likely. Most countries are selfishly think of only their own good instead of cooperating together.
- Tim :** Perhaps some intelligent and ethical AI should control the world? Humans should be kept in some sort of sandbox to prevent them from destroying the Earth.
- Ting :** To me, nothing human is indelible. Sooner or later, everything turns to dust . . . .
- Frida :** (sipping some cold tea) Looking at current tendencies, it makes some sense. If we manage to get through the next century without a major nuclear war, it will be a miracle.
